

Solapur Smart Healthcare, Emergency Analysis & Appointment Booking System

Stage-1:Hackathon Update

Team: HackHers

College:Dypcet,Kolhapur

Original Problem

- Single hospital appointment system
- No emergency handling
- No hospital availability analysis

Need for Update

- Emergency patients lack hospital availability info
- Overcrowding in hospitals
- Need city-level healthcare solution

Updated Problem Statement

Develop a city-wide healthcare platform for Solhapur to analyze patient urgency,
show hospital availability, and enable fast appointment booking.

Proposed Solution

- City-wide hospital listing
- Emergency urgency analysis
- Hospital crowd status
- Smart appointment booking

System Workflow

Symptoms → Urgency Analysis → Hospital Selection → Doctor →
Appointment Booking

Innovation & Uniqueness

- Emergency-aware hospital recommendation
- Priority-based appointment booking

Current Progress

- Website structure redesigned
- Emergency logic planned
- Hospital & booking modules updated
